I would prefer that you didn't submit this

You're missing a contextlib import in nova/utils.py - the tests don't even attempt to run because of this. Please fix and make sure the tests run before re-submitting

Also, please mention in the commit message which commits this cherry-picks e.g.

(cherry picked from commit e2403739d5e866e011ecc45a4d5b20d5e0192997 and commit [46d04831f5c290a40c14da415169749e2ef41383](#))

Fixed import, added source commit number.
I think, commit 46d04831 is not relevant here.
